Total de insertados vistos desde SQL Management

The screenshot displays the Microsoft SQL Server Management Studio (SSMS) interface. The central pane shows a SQL query that was executed successfully. The query includes a table creation statement for 'Alumno' and an insert statement. The results pane shows the first 10 rows of data inserted into the table. The status bar at the bottom indicates that the query was executed successfully and returned 101 rows.

```
create table Alumno(  
    carne int primary key,  
    nombre varchar(200),  
    posiblenota int  
);  
  
select * from temporal;  
select * from Alumno;  
  
delete from temporal;  
delete from Alumno;
```
